Home - Create a user account

There are two ways to create a user account:

Create an account using Suomi.fi or eIDAS identification

Your login and identity will be verified electronically.

If you create a user account using strong identification, your identity will be verified using electronic identification means. You can use Finnish online banking credentials, a certificate card or a mobile certificate to create an account. If you are an EU citizen, you can use your eIDAS identification to create an account. This way, you can log in to Enter Finland using a strong identification device issued in another EU country.

Create an account using your email address

Create a user account with your email address if you cannot use strong electronic identification.

Your identity will be verified when you visit a service point of the Finnish Immigration Service or a Finnish embassy or consulate abroad. If you use your email address to log in, two-factor authentication will be used. This means that every time you log in to your user account from a new device or browser, a verification code is sent to your email. You need to type in the code when you log in.

If you create an account with your email address, you can upgrade the account later so that you can log in using strong identification (Finnish online banking credentials, a certificate card, a mobile certificate or your eIDAS identification).

5. Заполните поля формы по инструкции ниже и нажмите «Create a user account» (Создать учетную запись).
